Questions you can ask your doctor

- Is my current level of menstrual bleeding abnormal?
- What do you think could be causing it?
- Are there tests you can do to diagnose the underlying cause or causes? Why are/aren't these tests right for me?
- Is my iron level being negatively affected by heavy bleeding?
- What can I do about it?
- What are my treatment options?
- What are the risks associated with the recommended treatment?
- What are the benefits?
- Am I a candidate for endometrial ablation? Have you done this procedure before? If not, can you recommend someone who has? What are the risks and benefits of the procedure?
